A '0' margin of error indicates this estimate was set equal to a population control, and therefore is without a margin of error. An 'N' indicates that this geographic area has too few sample cases to display an estimate. An '(X)' means no estimate. Except where noted, 'race' refers to people reporting only one race. 'Hispanic' refers to an ethnic category; Hispanic or Latino. If calculating a percentage, use the total population line within the section as the denominator. Do not use to calculate percentages. Margins of error will be included in the spreadsheet in a future release of Easy Stats.

*Sampling error.*

*estimate applies.*

*Hispanics may be of any race.*

*total population lines from other sections since these may have different universes.*
